'Low E Glass'
can pay for itself
by reducing your
energy bills.

Awning windows are suitable for architect designed homes

Awning windows are a great choice for higher positioned windows due to ease of use

Awning Windows

Awning windows, manufactured by Hi Lite Aluminium Products, are built for durability and designed to give you complete satisfaction through years of trouble-free operation. Awning windows come with smooth-action winders to give you effortless control over the amount of ventilation you require. In addition, the windows themselves have sturdy, slim frames to provide strength and security in all weather conditions. A weatherproof seal keeps out drafts, dust, and rain.

Glass can be selected from a number of high-performance options, which cater for Australia's extreme climate and energy rating requirements.
